Jakarta, Indonesia

PROFESSIONAL SUMMARY

Bachelor of Informatics Engineering graduate with almost 3 years of experience as a full-stack developer using TypeScript, JavaScript, React.js, Vue.js, jQuery, Express.js, and Next.js. Experienced in working with MySQL, PostgreSQL, Git, Linux, and Docker to build, refactor, test, debug, and deliver web applications. Currently working as a Full-Stack Developer in an AI-integrated marketing research environment. Focused on scalable web applications, clean code, UI/UX quality, and reliable product delivery.

WORK EXPERIENCE

FMRI Research and Analytics - Jakarta, Indonesia Fullstack Developer | Aug, 2025 – Jun, 2026

- Responsible for developing and building a full-stack web app boilerplate based on AI features for business research.
- Create and adjust global reusable components, states, fetching, and utils for clean and polished code.
- Develop and design UI app displays and UX app logic, features, and performance.
- Develop structured and reusable API architecture, including global routes, configs, API logic, database models, and server performance.
- Developed AI LLM Features that send json data and image format data besides prompt text with caching and optimized ai logic modules.
- Debug, fix, test, polish, and deploy deliverable high-quality code as a product.

PT. Poly Jaya Medical - Depok, Indonesia Full-Stack Developer | Jun, 2023 – Jun, 2025

- Developed and built app structure using React.js for frontend, Express.js for backend, and MySQL and PostgreSQL for databases.
- Developed and maintained global reusable components, states, fetching, and utils for code consistency.
- Developed and maintained UI app displays and UX app logic, features, and performance.
- Developed structured and reusable API architecture, including global routes, configs, controllers, services, database models, and server performance.
- Developed and built database table structures.
- Fixed, debugged, tested, polished, and deployed code.

PT. Indocyber Global Technology - Jakarta, Indonesia Full-Stack Developer | Feb, 2023 – Mar, 2023

- SQL training for IT Consultant.
- Net Framework training.

PT. Racer Robot - Jakarta, Indonesia Teaching Basic Robotics in SD, SMP, and SMA level. | Oct, 2019 – Jan, 2020

- Taught basic robotics to students at SD, SMP, and SMA levels.
- Delivered classroom guidance on fundamental robotics concepts and hands-on practice.
- Supported learning activities and introduced students to basic technical problem-solving.

PROJECT EXPERIENCES

FMRI AI Research Suite – FMRI Research and Analytics Project Full-Stack Developer | Sept, 2025 – Jun, 2026

- Developing an enterprise for business research based on AI tools using TypeScript, React.js, Node.js, Next.js monolith, Nest.js, Vue.js, tRPC, PostgreSQL, SequelizeORM, MongoDB, Mongoose, Ant Design, Mobx, Minio, AI-SDK, Git, Docker, Linux, and AWS for deploying.
- Build and develop AI-based features for business research tools such as FINDR for recognizing brand photos with AI, FUSE-AI for integrating existing client data with AI chat, and FINE-AI for generating questionnaire answers from synthetic respondents.
- Develop code based on project plan architecture, including databases, concepts, and mockup displays with Agile methods.
- Migrate This app framework from Remix.js to Next.js in 1 weeks for stable running without any errors.
- Test AI features, fix bugs, and deploy with AWS automation and hosting features.
- Link URI : <https://fmri-ai.com/>

FMRI FOMO – FMRI Research and Analytics Project Full-Stack Developer | Dec, 2025 – Jun, 2026

- Developing enterprise app features for a mystery shopping project system using Vue.js as web frontend, Pinia, Vuetify, Nest.js as backend, REST API, MongoDB, Mongoose, AWS S3, Docker, Git, and Linux.
- Develop deliverable improvement for app performance and UI/UX excellence for users. Inherit from service provider.
- Testing, fix bug, and deploy deliverable products.
- Link URI : <https://fmri-fomo.com/>

Monitoring Incubator Webapp – PT. Poly Jaya Medical Full-Stack Developer | Dec, 2024 – Mar, 2025

- Built and developed from scratch with existing architecture guidelines using JavaScript, React.js, Node.js, Express.js, MySQL, Sequelize, TailwindCSS, Material UI, REST API, Redux, Hostingers, Linux bash commands, and Git.
- Developed API for integrated MySQL incubator data output from smart incubator data transmission to MySQL and integrated it to browser.
- Testing, debugging, and deploy it.

Hospital Information System WebApp - PT. Poly Jaya Medical Full-Stack Developer | Dec, 2023 – Sep, 2024

- Built and developed this inherited project for hospital management system app using TypeScript, React.js, Next.js, Node.js, Express.js, PostgreSQL, Prisma, Material UI, Redux, REST API, Git, Docker, Linux bash commands, and VPS for deploying.
- Developed API monolith and scalable architecture for admin, storage in hospital, and outpatient system logics.
- Build and develop outpatient multirole structured menus and integrated to be scalable systems.
- Debugging, testing, and deploy high-quality codes.

Motion Simulator App - PT. Poly Jaya Medical Programmer | Jun, 2023 – Nov, 2024

- Built and developed desktop app for car and plane motion simulator with C# WPF GUI.
- Integrated data from Arduino microcontroller connected to firmware and motion simulator.

ORGANIZATIONAL EXPERIENCE

ABK UMKM – South Tangerang, Indonesia Administrator Staff

- Manage business plan data

EDUCATION

Islamic State University (UIN) Syarif Hidayatullah - Jakarta, Indonesia Bachelor Degree of Informatics Engineering | Aug 2016 – Aug 2022

- Thesis: AIS Usability Analytics and Mockup Apply for Improvements.
- Relevant Course Works: Web Development, System, UI/UX.

CERTIFICATIONS

Harisenin.com - Jakarta, Indonesia Full Stack Developer Bootcamp, Nov 2025 – Feb 2026

- Final Project: Designed and developed a website in Upcoming Tasks.
- Relevant Course works: HTML, CSS, JavaScript, Typescript, React.js, Node.js, Express.js, Mysql, Git, Linux, Docker, and Jenkins
- Certificate: <https://drive.google.com/file/d/1rAG94oxjCiDMEusgN6DuIsGJOzyWq9JR>

Node.JS - The Complete Guide (MVC, REST APIs, GraphQL, etc.) – Academind Udemy, Maximillian Schwarzmuller, Mar 2025 – Apr 2025

React - The Complete Guide 2025 (incl. Next.js, Redux) – Academind Udemy, Maximillian Schwarzmuller, Feb 2025 – Apr 2025

SKILLS

- **Front-End:** HTML, CSS, JavaScript, TypeScript, TailwindCSS, React.js, Next.js, Vue.js, jQuery, Material UI, Shadcn, Ant Design, Vuetify, Redux Toolkit, Zustand, MobX, Pinia, axios, Tanstack-Query.
- **Back-End:** Node.js, Express.js, Nest.js, Next.js Monorepo, Sequelize, Prisma, Mongoose, PHP, Laravel, EloquentORM, Go, Gorm, C#, Rest API, tRPC, Minio, AI-SDK, Openrouter
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Dev-Ops:** Git, GitHub, Docker, Jenkins, CI/CD, Linux, Vercel
- **Soft skills:** SDLC Agile Method, Problem Solving, Time Management, Detail Task List Orientation, Analytical Thinking and Teamwork
- **Languages:** Indonesian (Native), English (Intermediate)
